

THE SUPER-DOG PROJECT

The ActivPower Super-Dog Project

Evidence-supported conditioning, recovery and regeneration for the military and law-enforcement K9s of the world.

Featuring the A.T.T.A.C.K. Program

The 3 R's of Power

~15 Minutes a Day

The Super-Dog Project is a special initiative of ActivPower CANIS to put the best available, evidence-supported conditioning and recovery tools into the hands of the military and law-enforcement K9 programs of the world — so that the dogs who protect and serve can perform at their peak and, just as importantly, stay healthy, resilient, and in service longer. Our goal is simple: maximize the wellbeing and working capacity of every K9, responsibly.

Why the Super-Dog Project Exists

Working K9s take a beating. Every apprehension, every long search, every deployment leaves accumulated wear on muscles and joints — but a handler filling out hours of paperwork rarely has two hours to spend conditioning a partner who isn't visibly hurt.

Strong, well-conditioned muscle is what protects a joint, absorbs impact, and delivers power and speed — and it is what keeps a K9 injury-resilient over a long career. The Super-Dog Project exists to make that conditioning **simple, safe, and achievable inside a real working schedule**, using tools grounded in the science of loaded resistance exercise, tissue recovery, and targeted nutrition.

THE FLAGSHIP PROGRAM

The A.T.T.A.C.K. Program

Advanced Tactical Conditioning for K-9s — built on the **Three R's of Power**. Tactical means economy of effort: no wasted motion, every tool working toward the mission. ATTACK brings that same efficiency to canine conditioning — total power and injury resilience in about 15 minutes a day.

R · ONE

Resistance

Patented ActoBand K9 leg cuffs apply gentle isometric & isotonic load to the shoulders, back, hips and thighs during an ordinary 15-minute leashed walk — building muscle without the joint stress of heavier systems.

ActoBand K9™

R · TWO

Recovery

A short rubdown with the ActoRub K9 herbal liniment warms and relaxes worked muscle, supports local blood flow, and helps a hard-working K9 bounce back faster between shifts.

ActoRub K9™

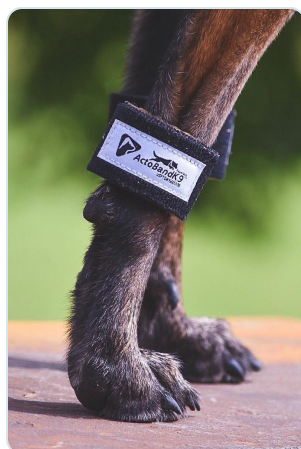

R · THREE

Regeneration

ATLAS, a 16-ingredient muscle, joint, immunity and gut-wellness supplement, is added to daily food to support recovery, resilience and overall condition from the inside out.

ActivPower ATLAS™

Resistance — ActoBand K9™

PATENTED · USPTO 15/605,938

The ActoBand K9 resistance system is a set of soft, flexible weighted cuffs that wrap around the legs. Worn during routine potty breaks and walks — as little as **15 minutes a day** — they apply controlled isometric and isotonic resistance to the large motor muscles and small stabilizing muscles of the shoulders, withers, hips and loins.

- ◆ Designed to build muscle and stamina within a few weeks of consistent use
- ◆ Distributes light, fractional loads across the limbs rather than the spine, reducing joint stress
- ◆ Fits into the handler's existing routine — no separate training block required
- ◆ Used by elite competitors on the world stage and by working K9 units in the field

Recovery — ActoRub K9™

PATENTED TOPICAL LINIMENT · US PATENT 10,918,685

ActoRub K9 is a 100% natural, non-GMO topical wellness rub formulated specifically for dogs, blending Ayurvedic herbal extracts and essential oils. Massaged into major muscle groups as part of a warm-up or cool-down, it penetrates to relax tight muscle, support healthy local blood flow, and ease the everyday soreness of hard physical work — helping muscles recover so conditioning gains come faster. *(Contains menthol — keep away from cats; for canine topical use only.)*

Regeneration — ActivPower ATLAS™

ATLAS is a high-potency muscle-and-joint wellness supplement combining **16 land- and sea-sourced ingredients** — simply added to the dog's existing food. It is built to support muscle and bone, joint comfort and mobility, a healthy inflammatory balance, gut immunity, and stamina — the “regeneration” that lets a K9 rebuild after the work is done. Suitable for dogs six (6) months and older.

ATLAS — Ideal Dosing (per kg body weight)	Amount	%DV
Green Lipped Mussel Powder	10 mg/kg	*
Sea Cucumber Powder	5 mg/kg	*
High Molecular Wt. Hyaluronan	5 mg/kg	*
MSM	7.5 mg/kg	*
Creatine monohydrate	2.5 mg/kg	*
Ascorbic acid (Vitamin C)	2.5 mg/kg	50%
ActivPower Herbal & Gut Wellness Blend — Turmeric (Curcumin), Piperine, Calcinated Curcumin, Boswellia serrata, Probiotics (Lactobacillus spp., 5M CFU), Diatomaceous earth, Calcium dolomite, Molasses powder	as formulated	

* Daily Value not established.

Built for the Working-K9 World

- ◆ **Time-efficient:** the whole protocol works inside a normal morning potty break and evening routine.
- ◆ **Safety-first:** intended for healthy, structurally sound, skeletally mature dogs; controlled, fractional loads; veterinary clearance recommended before starting.
- ◆ **Handler-friendly:** no complex equipment, no facility, no added hours — it fits the mission tempo of a busy unit.
- ◆ **Whole-dog:** resistance, recovery and regeneration work together rather than as isolated fixes.

From the Field

"All five dogs in the department's K9 force were started on the ActivPower ATTACK program. All K9s showed a significant boost in power, energy and muscle mass within 4 weeks. During the DARE graduation demos the K9s were downright explosive. The products and systems are great."

— Sgt. John Pyles, Winchester, VA

"The ATTACK program fits into my routine perfectly — an incredible asset for a small department where everyone is doing 5–6 extra jobs on top of patrol. With the ActoBands, ActoRub and Atlas it really simplifies the whole process."

— Officer Adam Brougham & K9 Apache, Belchertown, MA PD

"ActoBands ensure I can give my dog a safe, scientific isometric and isotonic workout in just 15 minutes every morning. This is how we train and stay fit for competing at the world-championship level."

— Vadim Plotsker, World Championship Competitor

"His conditioning has never been better since we started ActoBands & Atlas. He is ripped, his coat is better, tons of energy. Your products are definitely a winner."

— Erin O'Shea, multiple US National Champion & WUSV World Champion

Our Commitment — Responsible by Design

The Super-Dog Project is guided by welfare first. We recommend these tools only for healthy, mature working dogs, at controlled loads, and in partnership with the unit's veterinarian. We describe our products in terms of what the evidence supports — conditioning, recovery, mobility and wellness — and never as treatments for disease. Every program is introduced with clear instructions, safety guidance, and ongoing support, because the goal is not just a stronger K9 today, but a healthier, longer-serving partner over a full career.

Bring the Super-Dog Project to Your Department

Equip your K9 unit with the ActivPower ATTACK program — Resistance, Recovery and Regeneration in about 15 minutes a day.
